F-TYPE

It had to be powerful, agile and utterly distinctive. It had to look, feel and drive like a Jaguar. A true Jaguar sports car; the latest in a distinguished bloodline. We couldn't just call it F-TYPE; we had to make it F-TYPE.

F-TYPE is engineered for high performance and instantaneously responsive handling. Powerful, supercharged engines and a lightning-fast gearbox; lightweight aluminium body construction and an obsession with balance and proportion; a superb suspension and a host of advanced driving technologies; peerless design and a driver focused cockpit.

Together they produce a uniquely connected driving experience, and a sports car that only Jaguar could create - ultra-precise, powerful, sensual and, most of all, alive.

THREE DIFFERENT LIVES

There are three models, each equally at home on the switchback of a mountain pass, on the highway and in the city, while each offering its own distinctive flavour and characteristics.

F-TYPE is designed to deliver pure driving pleasure. It combines effortless, exhilarating performance, instant response and precise agile handling, with everyday refinement and usability.

F-TYPE S adds greater power and an increased range of sophisticated driving technologies.

F-TYPE V8 S offers towering performance and even greater levels of dynamic ability and control.

START

ENGINE

STOP

SUPERCHARGED ENGINES

Power is delivered from a range of three highly advanced engines - 3.0 V6 340PS, 3.0 V6 380PS and 5.0 V8 495PS. Each features a Roots-type twin vortex supercharger mounted in the 'V' of the engine to maintain the powerplants' compact dimensions.

Jaguar is a leader in the field of **Supercharged induction technology**. The advantages of supercharging are clear and compelling. It provides a linear delivery of performance, and instant access to high levels of torque at all engine speeds, minimising the gap between the driver's demand for power and the engine's response.

F-TYPE's Sports Exhaust delivers a crisp note from start up with the promise of performance, building to a race-car inspired crescendo at high rpm and during overrun. An **Active Sports Exhaust** is standard on **F-TYPE S** and optional on **F-TYPE**. The system features active bypass valves which open during performance driving to allow exhaust gases to exit more directly for a deep, dramatic sound. The **F-TYPE V8 S** has a **Switchable Active Exhaust** that allows manual control of the system, for even greater driver involvement.

V6

3.0 LITRE 340PS

0-100 KM/H

TOP SPEED KM/H

3.0 LITRE 380PS

0-100 KM/H

TOP SPEED KM/H

Jaguar's new generation supercharged 3.0 V6 engines are powerful and refined. Generating extremely high specific power outputs of up to 127PS per litre, they deliver thrilling performance and a rewarding driving experience. The compact supercharger's sophisticated boost control and secondary throttle valve ensure that torque curves rise steeply over a broad range of engine speeds. A water-cooled intercooler reduces the temperature of the intake air for greater power and efficiency, whilst an innovative system of counter-rotating front and rear balancer weights aids smoothness and refinement. They also feature a fast-reacting **Intelligent Stop/Start** system that can improve fuel economy by up to 5 percent.

V8

5.0 LITRE 495PS

0-100 KM/H

TOP SPEED KM/H

The 495PS 5.0 V8 is supremely powerful. A larger supercharger feeds the engine to deliver an astonishing peak torque of 625Nm from just 2,500rpm. Acceleration is rapid and progressive, response is immediate and predictable. Advanced technologies deliver performance, refinement and efficiency. The lightweight die-cast aluminium block is supplemented by cross-bolted main bearing caps to increase rigidity. Valves are controlled by dual independent variable cam timing to optimise power at all engine speeds. Spray-guided direct injection delivers precisely measured quantities of fuel directly into the centre of the combustion chambers at pressures of up to 150bar for cleaner, more efficient combustion. In common with the V6 engines, it also features an **Intelligent Stop/Start** system that can improve fuel economy by up to 5 percent.

QUICKSHIFT TRANSMISSION

**8-SPEED
RATIOS**

**ADAPTIVE
SOFTWARE**

**INSTANTANEOUS
RESPONSE**

F-TYPE's Quickshift automatic transmission is both lightning-fast and superbly refined, offering the benefits of a double clutch transmission and a conventional automatic without the limitations of either. Eight closely-spaced ratios keep the engine within its most effective rev range for longer, providing instantaneous response and outstanding driver feedback, while also optimising the engine for both economy and outright performance.

The transmission control system is intelligent and adaptive. It monitors the driving situation together with the demands the driver is making on the car, and responds to provide a truly dynamic experience. Adaptive software automatically modifies the gear shift strategy, ensuring the right gear is selected for every situation. **Fast Throttle-Off** recognises when the driver is making rapid throttle adjustments, for example during multiple manoeuvres, and automatically holds the gear ratio in anticipation of the next move. **Corner Recognition** senses when the car is in a corner and holds the ratio ensuring the car is in the correct gear when exiting a bend. When decelerating and changing down, the **Speed Matching Management System** matches the engine speed to the gearbox speed, and automatically 'blips' the throttle during downshifts when in Sport Automatic mode, while **Spontaneous Vehicle Deceleration** enables F-TYPE to rapidly downshift under very hard braking conditions.

Dynamic Launch Mode, standard on **F-TYPE S**, applies maximum torque through the gear changes delivering optimum acceleration from rest to 100 km/h.

The driver can, of course, take full manual control of the transmission using either gear shift paddles mounted behind the steering wheel, or the joystick-style SportShift gear selector. Once in manual mode, the Quickshift system delivers rapid and precisely timed engine torque interventions, creating shorter and crisper sounding gear shifts.

LIGHTWEIGHT ALUMINIUM CONSTRUCTION

STRONG AND RIGID

HIGH POWER-TO-WEIGHT AND TORQUE-TO-WEIGHT RATIOS

Jaguar has been at the forefront of aluminium car construction for more than a decade and continues to push the boundaries of the technology. F-TYPE builds on this expertise and uses advanced techniques derived from the aerospace industry, such as epoxy bonding and riveting, to contribute towards the car's light, strong and rigid body structure.

A lightweight aluminium body structure with high torsional rigidity is the ideal platform for a convertible sports car, and is fundamental to the way F-TYPE performs, handles and feels. A strong, stiff structure provides an inherently stable platform for precise, agile handling and allows the finely tuned suspension system to deliver connectivity and driver feedback. F-TYPE's body is the perfect complement to its high-performance engine range. Together they produce the exceptional power-to-weight and torque-to-weight ratios that deliver the real world measures of performance in a sports car.

All exterior panels are aluminium alloy with the exception of the boot lid which is made from composite materials, allowing hidden aerials to receive GPS and radio signals. These exterior panels are constructed from a new **AC600 alloy** that combines robustness and quality of finish with much greater formability for greater clarity and tightness of radiuses and feature lines. Jaguar has also developed a new '**warm forming**' technique for the inner door pressings which works like vacuum forming, using sheet metal rather than plastic. The use of advanced materials and innovative techniques allowed Jaguar's engineers to reproduce F-TYPE's beautifully crisp, crafted lines exactly as the designers had intended, as well as delivering a vehicle with extraordinary structural integrity.

ON BALANCE

**OPTIMUM WEIGHT
DISTRIBUTION**

**LOW CENTRE
OF GRAVITY**

**PERFECT
PROPORTIONS**

It is essential in the design of a great sports car that weight is kept to a minimum, is evenly distributed front to rear and that the centre of gravity is kept as low as possible. This configuration in F-TYPE means that the car has natural balance and is the result of meticulous attention to detail during the design and construction of the body structure. An uncompromising focus on weight distribution achieves the optimum balance between front and rear wheels, with items such as the battery, electronic systems and even the washer bottle located at the rear of the car.

A shorter car is more agile; a wider car is more stable. The relationship between F-TYPE's length of 4,470mm and width of 1,923mm was precisely engineered to deliver inherent agility and means that the car has outstanding driving dynamics. Its low centre of gravity reduces body roll in corners, while short front and rear overhangs mean that the mass is concentrated within the wheelbase. These essential factors combine to ensure that F-TYPE is naturally agile.

MOMENT OF MASS INERTIA

The closer the weight is to the centre of the car, the easier it is to turn the car.

$$I = \sum_{i=1}^N m_i r_i^2$$

TESTING

PUT TO THE TEST

F-TYPE first took to the road in the virtual world of Jaguar's Computer Aided Engineering (CAE) systems ensuring that all components underwent extensive development and testing before being committed to the physical testing process. Engineers produced a series of virtual prototypes to realistically simulate the behaviour of complex mechanical systems allowing them to analyse multiple variations until the optimum design was achieved. For example, using a technique first used in the aerospace industry, aerodynamic testing took place in a virtual wind tunnel with Computational Fluid Dynamics running on high speed supercomputers. During its virtual life, F-TYPE completed half a million analyses, requiring 10 million computer processor hours and creating 300TB of data. The CAE development process was one of the key contributing factors in delivering F-TYPE's exhilarating performance and responsiveness.

DEATH VALLEY CALIFORNIA

Temperature up to 46.9°C

HOT CLIMATE
TESTING

COMPUTER AIDED
ENGINEERING

COMPUTATIONAL
FLUID DYNAMICS

10 MILLION
PROCESSOR HOURS

The real world testing to prove the car and fine tune the set-up took place in specialist facilities and the harshest environments across the globe in temperatures ranging from -40°C to +50°C, and at altitudes of up to 4,000m. High-speed stability tests, for example, were conducted at Nardo in southern Italy. The Nordschleife circuit at the Nürburgring in Germany was the perfect location to prove out handling, braking, cooling and durability. Known as the “Green Hell”, and featuring 20.8 kilometres of track with 73 turns, it is renowned as the most demanding circuit in the world and the ultimate test of both car and driver.

BROUGHT TO LIFE

The essential ingredients in place, F-TYPE is ready to take on the world's most thrilling roads. You'll discover an intuitive and instinctive driving experience like no other. An experience that surpasses high performance and pin sharp handling to deliver pure entertainment. The most awe-inspiring and exhilarating twists and turns on the road belong to F-TYPE.

ACTIVE AERODYNAMICS

100 KM/H INITIATES AUTO DEPLOY | REDUCES LIFT BY UP TO 120KG | 65 KM/H INITIATES AUTO RETRACT

Aerodynamic performance is the essence of F-TYPE's design and is seamlessly integrated into the body for low levels of lift and excellent stability at high speed. A front splitter beneath the grille and rear venturi manages airflow along the vehicle's underside with the sharply defined tail helping air to separate cleanly at lower speeds. A deployable rear spoiler rises at speeds in excess of 100 km/h to **reduce lift by up to 120kg**. Even the door handles retract when not required, with their flush design creating an uninterrupted air flow along the flanks.

THE FASTEST CONNECTION BETWEEN DRIVER AND ROAD

F-TYPE's quick, responsive steering is designed to provide the most direct connection between the driver's hands on the wheel and the contact point of the tyres on the road. The car's quick steering rack delivers a precise reaction to driver input. The feeling of connection is also maximised by the use of aluminium alloy for the front subframe. This not only helps to reduce weight, but, in conjunction with F-TYPE's forged alloy suspension, also creates an immensely strong structure for the ultimate in precise feedback and control.

VEHICLES SHOWN: F-TYPE V8 S IN SALSA RED

PERFORMANCE BRAKING SYSTEMS

Three braking systems are available, each engineered to deliver confident, progressive feel and sustained, consistent high performance. The front calipers make extensive use of aluminium to reduce the unsprung mass of the car, benefiting both handling and ride refinement. Each system features large, ventilated brake discs - up to 380mm in diameter on the High Performance and Super Performance systems. This large swept area improves braking force as well as providing greater capacity for the discs to absorb and dissipate the heat energy generated during braking.

Brake cooling is also enhanced with additional suspension scoops and ducts developed with the assistance of advanced Computational Fluid Dynamics systems. This channels cooling air directly to the brakes, reducing fade, and helping sustain their performance during extended periods of dynamic driving.

CHASSIS AND SUSPENSION

F-TYPE's aluminium body creates an immensely stable platform from which the all-round aluminium double wishbone suspension can control the car. With the damping set-up tuned for the best partnership between dynamics and refinement, it gives the perfect combination of control, agility and feedback.

On F-TYPE S and F-TYPE V8 S models, Adaptive Damping assesses body motion and pitch 100 times per second, and adjusts the settings for each damper accordingly. The system improves control, handling and agility as well as the ability to rapidly detect and react to changing driving conditions and driver demands. It achieves this with a series of sensors that are placed around the car to monitor the body's vertical movement, pitch and roll rates. Steering wheel position is measured 500 times per second enabling the system to predict the body's roll rate. The stiffness of each individual damper is then adjusted to help maintain control, stability and agility.

ELECTRIC MOTOR ON MULTI-PLATE CLUTCH MANAGES DELIVERY OF TORQUE TO EACH REAR WHEEL

SYSTEM RECOGNISES SUBTLE SLIPPAGE DIFFERENCES. CAN APPLY FULL LOCKING TORQUE ALMOST INSTANTANEOUSLY

DIFFERENTIALS

The mechanical **Limited Slip Differential** featured in **F-TYPE S** was chosen because of its innate suitability for the rear-wheel drive sports car experience. It offers the perfect opportunity to leverage the car's superb handling and the upper limits of its grip. The Limited Slip Differential improves traction and agility during acceleration out of corners and on slippery surfaces. The car can also make better use of the available traction before the DSC system needs to intervene and results in more refined stability control during dynamic driving.

An **Electronic Active Differential** provides **F-TYPE V8 S** with the ultimate in agility and control. Working in conjunction with the stability, traction and ABS systems, the Electronic Active Differential uses an electric motor acting on a multi-plate clutch to manage the delivery of torque to each of the rear wheels. Full electronic control of the rear differential lock enables the system to apply full locking torque almost instantaneously. The Electronic Active Differential allows for very fine control of the power delivery to limit wheelspin, maximise traction and offer even greater levels of control.

VEHICLE SHOWN: F-TYPE V8 S IN SALSA RED

ADAPTIVE DYNAMICS

Adaptive Dynamics instinctively modifies the car's response to road conditions and driver input, enhancing the driving experience. It analyses how the car is being driven by measuring acceleration and braking, cornering, as well as road load and kick down activation. It then uses sophisticated adaptive software to ensure that the most appropriate gear shift strategy is automatically selected. For even more responsive performance, the selection of Sport Mode alters the gear shift programme to deliver shorter shifts and hold ratios at higher revs for longer.

DYNAMIC MODE

SHARPENED
THROTTLE RESPONSE

QUICKER
GEAR SHIFTS

Dynamic Mode remaps the car's software to further emphasise its sporting character. It sharpens the throttle response, increases steering weighting and performs gear shifts more quickly and at higher engine speeds. Selecting Dynamic Mode also prevents automatic upshifts when the gearbox is used in manual mode.

On **F-TYPE S** and **F-TYPE V8 S** models, the **Configurable Dynamics** system allows the driver to define which characteristics are altered when Dynamic Mode is selected. This option also features the **Dynamic-i** display system, which can show performance indices such as G-Force meter and lap time, plus throttle, steering and brake inputs on the 8 inch Touch-screen.

ASSISTANCE AND REASSURANCE

➤ **BLIND SPOT MONITOR | REVERSE TRAFFIC DETECTION | INTELLIGENT HIGH BEAM**

Sophisticated driver assistance systems are available to provide reassurance, information and control, and allow the driver to focus on the pleasure of the drive. These include **Cruise Control with Automatic Speed Limiter** and **Blind Spot Monitoring**, which is designed to help alert the driver to the presence of a vehicle in an adjacent lane. **Reverse Traffic Detection** can provide warnings of other vehicles in the reversing path of F-TYPE, for example when in a car park. **Front and Rear Parking Aids** and a **Reverse Park Camera** also provide valuable assistance during parking manoeuvres.

Bi-function HID Xenon headlamps provide an intense white light for both main and dipped beam in a single unit. The optional **Adaptive Front Lighting** system measures the speed of the car and angle of the steering wheel, swivelling the lamps by up to 14 degrees out, and up to 7 degrees in, for improved visibility during cornering. The optional **Intelligent High Beam** system automatically switches between low and high beam when necessary, using a sensor mounted at the front of the rear view mirror. The rear lamps feature LED technology with light guides that not only create a distinctive design, but also have the ability to illuminate to full brightness more quickly than conventional bulbs, potentially giving a following driver more time to react.

Every F-TYPE also features a complement of advanced active and passive safety systems, including **Emergency Brake Assist (EBA)**, **Electronic Brake-Force Distribution (EBD)**, driver and passenger front airbags, seat mounted airbags with head protection, seat belt pre-tensioners, roll over protection bars and an industry-leading **Pedestrian Contact Sensing System™**.

VEHICLE SHOWN: F-TYPE S IN SATELLITE GREY

F-TYPE immediately connects with the driver, so that he or she becomes almost an extension of the car. Its 1+1 configuration is designed to wrap around the driver. The cockpit's design provides visibility, minimal distractions and close-to-the-centre-of-gravity seating with rigid seat frames and structure. The fascia has been intentionally kept as low as possible and free from clutter to increase the forward view. The **Intelligent Venting System**, part of the advanced climate control system, hides the twin central air vents which automatically deploy when required, rising from the dashboard and retracting after use. Two seat styles are available, the standard **Sports Seat**, and an optional **Performance Seat**, offering enhanced lateral support during rapid cornering and upholstered in Premium leather. For the ultimate in luxury, all models can also be specified with the optional **Premium leather interior**, which adds leather to the upper fascia, centre console and door casings.

THE FEELING INSIDE

F-TYPE's interior conveys a combination of functional ergonomics with sporting style through its meticulously considered cockpit architecture, its simple controls and its clear instrumentation. It is designed to put the driver first and to be an opportunity for individual expression. Everything offers a rewarding, highly tactile experience with extensive ranges of fine leathers, colours and materials making it more personal. Push the Start button and the car comes alive with a cascade of light from the switchgear. **Configurable Lighting**, standard on **F-TYPE S** and **F-TYPE V8 S**, adds even greater personalisation with choices of Phosphor Blue, Pale Blue, White, Coral or Red to suit the driver's mood. Activate Dynamic Mode and the lighting switches to Red on the door grab handles, centre console and instrument cluster.

MERIDIAN

IN-CAR ENTERTAINMENT

JAGUAR
SOUND SYSTEM

MERIDIAN SOUND
SYSTEM 380W

MERIDIAN SURROUND
SOUND SYSTEM 770W

Three superb audio systems bring the cockpit to life with incredible, rich sound.

The superb **Jaguar Sound System** brings depth and power to in-car entertainment with 6 speakers, 180W and 8 channels. The system features Dynamic Volume Control which compensates for changes in sound levels within the car to ensure that audio quality is always consistent.

Two higher specification systems were designed in conjunction with British audio experts Meridian specifically for F-TYPE. They feature advanced technology such as Digital Signal Processor (DSP) software to optimise every element of the system and use Meridian Cabin Correction's advanced algorithm to redefine the operating parameters and ensure that the audio experience is superbly consistent - roof up and roof down. The **Meridian Sound System** offers superb audio reproduction through 10 speakers - including 2 sub woofers, 380W and 12 channels. The ultimate **Meridian Surround Sound System** features 12 speakers and 770W. This advanced system uses Meridian Trifield™ technology to ensure a perfect stereo sound for both driver and passenger.

Option on F-TYPE, F-TYPE S and F-TYPE V8 S

EVEN THE ROOF IS FAST

F-TYPE's fabric roof offers both light weight and refinement with the outer canopy acoustically enhanced with composite fabric and a flush fitting heated rear window glass. The roof can be raised or lowered in just **12 seconds** and operated fully automatically at speeds of **up to 50 km/h**. Its neat, compact stowage keeps the rear of the car low and sleek and avoids the need for a tonneau cover - another weight saving. An optional removable wind deflector can also be fitted between the roll over protection bars.

SEATS

Two seat styles are available in all models, each offering superb comfort and support. On **F-TYPE** and **F-TYPE S** the **Sports Seat** with leather and Suedecloth facings is standard. **F-TYPE V8 S** models gain the added luxury of full leather facings. All models can also be specified with the optional **Performance Seat** which offers enhanced lateral support during rapid cornering, and is upholstered in Premium Leather. Both the Sports and Performance seats feature 4 way electric and 2 way manual adjustment, or 14 way electric adjustment and memory function as an option. They can also be specified with a heated function. For the finishing touch, it is also possible to choose from Jet, Red or Camel seatbelts.

Now you're ready to choose just the right interior colour combination from Jaguar's exclusive collection.

VEHICLE SHOWN: F-TYPE S IN SATELLITE GREY WITH OPTIONAL RED BRAKE CALIPERS, PERFORMANCE SEATS AND CARBON FIBRE EXTERIOR ACCESSORIES

ADDED ATTITUDE, ADDED OPTIONS

F-TYPE's strong visual assertiveness can be further enhanced thanks to the availability of two exciting options - **Design Pack** and **Black Pack**. The Design Pack features body coloured sill extensions, front aerodynamic splitters and a Gloss Black rear valance and, on **F-TYPE** and **F-TYPE S** models only, a colour-keyed rear venturi. The Black Pack features a Gloss Black finish on the front grille and surround, as well as to the bumper beam, bonnet louvres and front splitter. The Gloss Black finish also extends to the front outer meshes, side power vents, rear valance and the roll over protection bars.

DESIGN PACK

1. Body coloured front bumper splitter 2. Body coloured aerodynamic splitters 3. Body coloured side sill extensions 4. Gloss Black rear valance 5. Body coloured rear bumper venturi

INTERIOR BLACK PACK

1. Gloss Black air vent surrounds and door switch pack surrounds 2. Flat-bottomed Sports steering wheel with Gloss Black trim finisher 3. Gloss Black Instrument Cluster Dial Rings 4. Black Hex Aluminium console finisher

EXTERIOR BLACK PACK

1. Gloss Black finish to front grille and surround, bumper beam, front splitter and front outer meshes 2. Gloss Black bonnet louvres 3. Gloss Black side power vents 4. Gloss Black rear valance and Roll Over Protection Bars

ACCESSORIES

A wide range of high quality accessories is available from your Jaguar dealer. They are all designed to complement your lifestyle, add further individuality or enhance practicality. For the full, extensive collection of F-TYPE accessories, please refer to the Specification and Price Guide.

SUEDECLOTH STEERING WHEEL WITH CARBON FIBRE CENTRE CONSOLE FINISHER

Enjoy the supple touch and stylish look of the luxurious Suedecloth steering wheel.

CARBON FIBRE ENGINE COVER

Add a dynamic flair to your F-TYPE with this lightweight Carbon Fibre cover.

WIND DEFLECTOR

Reduce wind in the cabin with this easy to install, quick to remove, wind deflector.

CARBON FIBRE ROLL OVER PROTECTION BARS

Accentuate your F-TYPE's contemporary sporting style with these Carbon Fibre Roll Over Protection Bars.

**BLADE FORGED ALLOY
TECHNICAL GREY/CARBON FIBRE**

Express your own style to your F-TYPE with these striking forged 20 inch wheels. Featuring high-grade Carbon Fibre inserts and Jaguar's dynamic 'Blade' design.

CARBON FIBRE MIRROR COVERS

Accentuate the dynamic design of your F-TYPE's exterior mirrors and add further individuality to its sporting character.

CARBON FIBRE BONNET LOUVRES

Emphasise one of your F-TYPE's most distinctive features with these high-grade Carbon Fibre Bonnet Louvres.

IMPORTANT NOTICE

Jaguar Cars Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up to date literature, this brochure should not be regarded as an infallible guide to current specification, nor does it constitute an offer for the sale of any particular vehicle. Distributors and dealers are not agents of Jaguar Cars Limited by any express or implied undertaking or representation.

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO 14040, the international standard for vehicle 'whole life cycle' assessment. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through its driven life time, to final disposal. But that's not all. Every new Jaguar vehicle is designed to be 85% recyclable and reusable, in addition 95% recoverable and reusable with 10% potentially for energy generation.

The XJ, F-TYPE and XK's innovative use of lightweight aluminium, which incorporates up to 50% recycled material from the manufacturing process in the body structure, provides considerable performance benefits. This includes improved fuel consumption, and less CO₂ emissions as well as the dynamic performance inherent in its weight saving design.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste. Already the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009 is offset. For every tonne of CO₂ emitted in the assembly process, Jaguar invests in carbon reduction projects that reduce an equivalent tonne of CO₂ elsewhere.

Offsetting allows Jaguar to take action now, to reduce its impact on the environment, as part of an integrated carbon management plan. The company plan includes targets to reduce operating CO₂ emissions and waste to landfill by 25% by March 2013 and European fleet average tailpipe CO₂ emissions by 25% by 2015. All targets are based on 2007 levels.

But it doesn't stop there. We have been awarded Platinum status in the Corporate Responsibility Index 2012 from the UK's Business in the Community, in recognition of our 360 degree approach to sustainable development.

That's Environmental Innovation at Jaguar.
